WHY IT MATTERS FOR iMS?

Diagram illustrating the integration of SCADA and iMS systems for Multi-site Management + Digital Operations. The diagram shows a sequence of steps: 1) SCADA data is collected from multiple sites. 2) iMS (Industrial Management System) processes the data. 3) iMS outputs data to a central system. 4) The central system manages the data. The final output is 'Multi-site Management + Digital Operations'.

Use Case: Multi-site Management / Digital Operations
